

SBS VIRACOAT *Antimicrobial Coating*

SBS VIRACOAT Antimicrobial Long-term Coating Products can Increase Effectiveness for Better Hygiene in Public Buildings, Schools, Homes and more.

Classic damp cleaning has hardly any effect on the number of bacteria and fungi present. Studies show that the SBS technology on flooring dramatically reduces the number of pathogens.

The SBS VIRACOAT Antimicrobial embedded Nano Ceramic technology:

- is embedded into the material and is safe for man, pets and the environment.
- is effective against a wide range of harmful pathogens, bacteria and fungi.
- keeps flooring looking new longer, reducing premature material aging.
- hinders stain development caused by colonization of microbes and contaminants.
- offers constant 24/7 protection, even between regular cleaning cycles.

Just think about everywhere your shoes have stepped today! The permanent SBS technology on flooring helps improve general well-being and cleanliness by hindering the growth of pathogens, bacteria, virus, mildew and mold.

Public buildings like schools, airports, pools, spas and fitness centers, hospitals, shopping centers, office buildings and hotels as well as your home can benefit from the SBS technological antimicrobial coating products.
